(QUESTION 30 - QUESTION 42)OverviewFabrikam, Inc. is a real estate company that has 2,000 employees. Fabrikam has a main office and a branch office. The main office is located in New York City. The branch office is located in Miami.Existing EnvironmentActive Directory EnvironmentThe network contains one Active Directory forest named fabrikam.com. The forest contains a single domain. An Active Directory site named Site1 exists for the office in New York City. An Active Directory site named Site2 exists for the office in Miami. Site1 contains two domain controllers. Site2 contains one domain controller. Both sites connect to each other by using a low-latency, high-bandwidth WAN link. All servers in the domain run Windows Server 2012 R2. Site1 contains 1,500 client computers. Site2 contains 300 client computers. Two hundred users work from home. The computer of each home user is not a member of Active Directory. Current Network and Computer Environment Remote Desktop Services (RDS) is deployed to Site1. RDS role services are installed on four servers. The servers are configured as shown in the following table.

Server name	RDS role
Server1	Remote Desktop Connection Broker (RD Connection Broker)
Server2	Remote Desktop Gateway (RD Gateway)
Server3	Remote Desktop Session Host (RD Session Host)
Server4	Remote Desktop Web Access (RD Web Access)

An application named App1 is published as a RemoteApp program. Version 1.2 of an application named App2.exe is deployed to all of the client computers in Site1.Version 2.0 of App2.exe is deployed to all of the client computers in Site2. The client computers deployed to Site1 during the current month have a value of Value1=True in the registry. Computers deployed before the current month do not have the Value1=True registry value. Microsoft System Center 2012 R2 Configuration Manager is used to manage the client computers in Site1. Windows Intune is used to manage the client computers in Site2 and the client computers of the users who work from home. The relevant client computers in Site1 are configured as shown in the following table.

Computer name	Ope...
Computer1	32-bit version of Wi...
Computer2	64-bit version of Wi...
Computer3	64-bit version of Wi... Pack1 (SP1)

The relevant client computers in Site2 are configured as shown in the following table.

Computer name	Operating system
ComputerA	32-bit version of Windows 8.1 Enterprise
ComputerB	64-bit version of Windows 8.1 Enterprise
ComputerC	32-bit version of Windows 7 Enterprise S...

Configuration Manager EnvironmentConfiguration Manager has the collections configured as shown in the following table.

The Configuration Manager collections have the maintenance windows configured as shown in the following table.

Collection name	Ma
Collection1	01:00
Collection2	02:00
Collection3	03:00

Configuration Manager has the software metering rules configured as shown in the following table.

Rule name	File name	
Rule1	App2.exe	1.*
Rule2	App2.exe	*

Configuration Manager has the antimalware policies configured as shown in the following table.

Policy name	Order	Deployed to
Default Client Antimalware Policy	10000	Not applicable
Policy1	1	Collection1
Policy2	2	Collection2
Policy3	3	Collection3

Configuration Manager has the VPN profiles defined as shown in the following table.

Profile name	Deployed to
VPNprofile1	Collection4
VPNprofile2	Collection5

Both VPN profiles are provisioned for all supported platforms.Configuration Manager has a baseline named Baseline1. Baseline1 validates whether RemoteDesktop is enabled. Baseline1 is deployed to Collection1.Windows Intune ConfigurationWindows Intune has a group named Group1. ComputerA and ComputerB are members of Group1. A 32-bit update for Windows 8.1 named CustomUpdate1 is added to Windows Intune. Configuration Manager and Windows Intune are not integrated.Problem Statements Fabrikam identifies the following issues on the network:- RDS users report that when they access the RD Web Access website, they receive the following security warning message: "The security certificate presented by this website was not issued by a trusted certificate authority."- The RDS users do not see App1 on the RD Web Access website. They can see other publishedRemoteApp programs.- Value1=True is not present on some of the client computers in Site1.RequirementsBusiness GoalsFabrikam plans to implement a single solution to manage all the client computers and devices. As much as possible, Fabrikam plans to minimize the costs associated with purchasing hardware and software.Planned ChangesFabrikam plans to implement the following changes to the network:- For Site2, purchase the mobile devices configured as shown in the following table.

Device name	Type	Operating system
ComputerD	Tablet	Android 4.0
ComputerE	iPad	iOS 7

- Start using Windows Intune for mobile device management.- Approve CustomUpdate1 for Group1.Technical Requirements Fabrikam identifies the following technical requirements:- Minimize administrative effort, whenever possible.- Manage the purchased mobile devices in Site2 by using Windows Intune.- Ensure that Baseline1 only assesses Windows 8.1 computers in the targeted collections.- For Computer3, limit the CPU usage of antimalware software up to 60 percent during antimalware scans.- Publish RemoteApp and Desktop Connection programs to the Start screen of each RDS user's client computer.- Create a collection named Collection6, which contains the client computers in Site1 that do not have the Value1=True registry value.Application RequirementsFabrikam identifies the following application requirements:- Publish App3 as a RemoteApp program.- Show App1 on the RD Web Access website.- Deploy a Windows Phone app named App4 to Windows Phone 8.1 users by using Windows Intune. QUESTION 30You need to recommend a solution to resolve the issues reported by the RDS users. What should you include in the recommendation? A.   Run the Set-RDCertificate cmdlet.B.   Modify the collection properties.C.   Modify the RDWeb web application settings.D.   Modify the RemoteApp program properties. Answer: A QUESTION 31Drag and Drop QuestionYou need to identity the maintenance windows for Computer 1, Computer2 and Computer3. What should you identity? To answer, drag the appropriate maintenance windows to the correct computers. Each maintenance window may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Maintenance Windows

| 01:00 to 03:00 |
| 01:00 to 04:00 |
| 01:00 to 05:00 |
| 02:00 to 03:00 |
| 02:00 to 04:00 |
| 02:00 to 05:00 |
| 03:00 to 05:00 |

Answer Area

Computer1:   Maintenance window

Computer2:   Maintenance window

Computer3:   Maintenance window

QUESTION 34Hotspot QuestionYou need to identify which hardware classes of Computer1 and Computer2 will be included in the Configuration Manager inventory. What should you identify? To answer, select the appropriate hardware class for each computer in the answer area. **Answer Area**

Hardware inventory class	Computer1	Computer2
1394 controller	☐	☐
BaseBoard	☐	☐
Battery	☐	☐
BitLocker	☐	☐

Answer: **Answer Area**

Hardware inventory class	Computer1	Computer2
1394 controller	☑	☑
BaseBoard	☑	☑
Battery	☑	☑
BitLocker	☐	☑

QUESTION 35You need to provide a solution to meet the technical requirements of Collection6. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer. A.   Create a task sequence.B.   Create a collection that has a direct membership rule.C.   Create a configuration item.D.   Create custom device settings. Answer: B QUESTION 36You need to meet the application requirements of App3. To which server should you install App3? A.   Server1B.   Server2C.   Server3D.   Server4 Answer: C QUESTION 37You need to identify to which client computer CustomUpdate1 will be applied. Which computer should you identify? A.   Computer1B.   ComputerAC.   ComputerBD.   ComputerC Answer: B QUESTION 38You need to meet the application requirements of App4. What should you do first? A.   Create a Mobile Device Security Policy.B.   Upload App4 to Windows Intune.C.   Set the Mobile Devices Management Authority.D.   Install the Windows Intune client software. Answer: C QUESTION 39Hotspot QuestionYou need to identify on which computers the usage of App2 will be metered. Which computers should you identify? In the table below, identify on which computers the usage of App2 will be metered. Make only one selection in each row **Answer Area**

	App2.exe usage will be metered	App2.exe usage will not be metered
Computer1	○	○
Computer2	○	○
Computer3	○	○
ComputerA	○	○
ComputerB	○	○
ComputerC	○	○

Answer:

Answer Area

	App2.exe usage will be metered	App2.exe usage will not be metered
Computer1	●	○
Computer2	●	○
Computer3	●	○
ComputerA	○	●
ComputerB	○	●
ComputerC	○	●

QUESTION 40You need to provide a solution to meet the technical requirements of Baseline1. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer. A.   Create a new collection from the baseline deployment.B.   Modify the configuration item properties.C.   Create a collection that has a limiting collection.D. Modify the collection properties. Answer: B QUESTION 41Hotspot QuestionYou need to prepare ComputerD and ComputerE to meet the technical requirement. Which action should you perform on each computer? In the table below, identify the action to perform on each computer. Make only one selection in each column. **Answer Area**

Actions	ComputerD	ComputerE
Install the 32-bit Windows Intune client.	○	○
Install the 64-bit Windows Intune client.	○	○
Install the Windows Intune Company Portal app.	○	○
Run a remote task in Windows Intune.	○	○
Create a policy in Windows Intune.	○	○

Answer: **Answer Area**

Actions	ComputerD	ComputerE
Install the 32-bit Windows Intune client.	○	○
Install the 64-bit Windows Intune client.	○	○
Install the Windows Intune Company Portal app.	●	●
Run a remote task in Windows Intune.	○	○
Create a policy in Windows Intune.	○	○

QUESTION 42You need to meet the technical requirement of Computer3. What are three possible ways to achieve this goal? Each correct answer presents a complete solution. A.   Create a new antimalware policy.B.   Increase the priority of an antimalware

policy.C.   Delete an antimalware policy.D.   Modify the membership of Collection2.E.   Modify the membership of Collection3. Answer: BCD QUESTION 43Hotspot QuestionYou have a Windows Intune subscription. You have 20 client computers that run Windows 8.1 and have the Windows Intune client installed. The computers run an application named Appl. You create two automatic approval rules. The rules are configured as shown in the following table.

Role name	Product category	Update classification	G
Rule1	All categories	Security updates	G
Rule2	Windows 8.1	Security updates	G

You upload an update for App1 named App1_Update1 to Windows Intune and an update named KB2929961 is made available in Windows Intune. The settings of the updates are configured as shown in the following table.

Update name	Classification	A
App1_Update1	Security updates	Custom soft
KB2929961	Security updates	Windows 8.

You need to identify which groups will receive the updates. Which groups should you identify? To answer, select the appropriate group for each update in the answer area.

Answer Area

KB2929961:
- Will not be deployed.
- Will be deployed to Group1 only.
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2.

App1_Update1:
- Will not be deployed.
- Will be deployed to Group1 only.
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2.

Answer: **Answer Area**

KB2929961:
- Will not be deployed.
- Will be deployed to Group1 only.
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2. *(selected)*

App1_Update1:
- Will not be deployed.
- Will be deployed to Group1 only. *(selected)*
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2.

QUESTION 44You have a Microsoft System Center 2012 R2 Configuration Manager primary site that is integrated with System Center Updates Publisher 2011. You need to deploy third-party updates to users by using Configuration Manager. You must ensure that the update binary files are downloaded only to Update Publisher if a Configuration Manager client requests the update. What should you do from Update Publisher? A.   Create a rule.B.   Create a publication.C.   Run the Add Software Update Catalog wizard.D.   Modify the Trusted Publishers options. Answer: C QUESTION 45Hotspot QuestionYou open the Microsoft System Center 2012 R2 Configuration Manager console as shown in the exhibit. (Click the Exhibit button.)
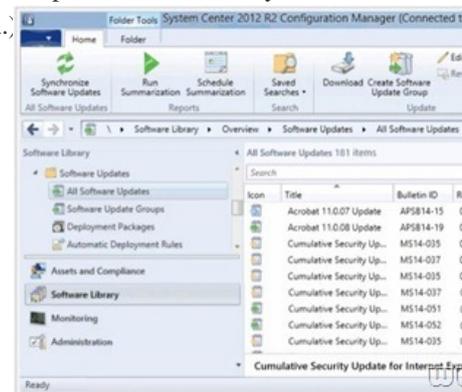

Use the drop-down menus to select the answer choice that completes each statement.

Answer Area

Update with the bulletin ID APSB14-15 is [**answer choice**]

| expired. |
| for reporting only. |
| invalid. |
| superseded. |

Update with the bulletin ID MS14-035 is [**answer choice**]

| expired. |
| for reporting only. |
| invalid. |
| superseded. |
