Answer: B QUESTION 3You are implementing a claims-based authentication solution for a SharePoint farm in an Active Directory Domain Services domain. You install and configure Active Directory Federation Services (AD FS). You need to ensure that all web applications in the farm support SAML-based claims authentication. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A.   Configure AD FS with the web application as a relying party.B.   Configure web applications to use forms-based authentication and AD FS as the trusted identity provider.C.   Configure web applications to use claims-based authentication and AD FS as the trusted identity providerD.   Configure web applications to use classic mode authentication and AD FS as the trusted identity provider.E.   Configure SharePoint to trust AD FS as an identity provider. Answer: ACE QUESTION 4You are moving a customized SharePoint site collection to a new farm. You attach and mount the source content database in the destination farm. You need to ensure that all customizations from the source farm are available in the destination farm. What should you do? A.   Install all custom applications in the destination farm.B.   Copy all custom master pages from the source site collection to the Style Library in the destination site collection.C.   Copy all SharePoint groups and users from the source farm to the destination farm.D.   Copy all custom master pages from the source site collection to the master page gallery in the destination site collection. Answer: A QUESTION 5An organization upgrades a SharePoint 2010 environment to SharePoint 2013. A site collection is running in SharePoint 2010 compatibility mode. You must verify that the following features will function correctly when the site collection is upgraded to SharePoint 2013 native mode:- List views- Custom web parts- Content query web parts- SubsitesYou need to ensure that you can perform verification testing without impacting the current user experience. What should you do? A.   Upgrade the site collection to SharePoint 2013.B.   Perform a database attach upgrade.C. Enable the Visual Upgrade option for the site collection.D.   Generate an upgrade evaluation site collection. Answer: D QUESTION 6Drag and Drop QuestionA company plans to upgrade from a SharePoint Server 2010 farm to a SharePoint Server 2013 farm. You plan to install components that are required on the new farm before upgrading. You need to identify the customizations that must be installed on the new farm. Which command should you run? (To answer, drag the appropriate command and switch to the correct locations in the answer area.)

Answer:

QUESTION 7Drag and Drop QuestionAn organization migrates a SharePoint environment from SharePoint 2010 to SharePoint 2013. The organization has a web application at http://intranet.contoso.com. A corporate governance policy states that users of the web application must be able to create sites only with a compatibility level of SharePoint 2013. You need to implement the governance policy. Which three Windows PowerShell cmdlets should you run in sequence? (To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.)

Answer:

QUESTION 8A SharePoint 2010 environment contains a Microsoft SQL Server 2008 R2 database instance named SP-SQL that hosts the databases for the farm. You are upgrading the farm to SharePoint 2013. You need to ensure that users can access the unmodified farm contents during the upgrade process. What should you do? A.   In SQL Server Management Studio, locate the SQL Server instance containing the content databases and service application databases you plan to upgrade. Set the Instance Read-Only value to True.B.   Run the following Transact-SQL (T-SQL) statement for each content database and service application you plan to upgrade. ALTER DATABASE <database name>SET READ_ONLY;C.   Run the following command-line tool for each site collection in the content databases you plan to upgrade. Stsadm -o setsitelock -urKsite collection name> -lock readonlyD. Sign in to Central Administration in the SharePoint 2010 environment you plan to upgrade. Set each content database and service application database to Read-Only. Answer: B QUESTION 9Drag and Drop QuestionYou are preparing to upgrade from a SharePoint 2010 environment to a SharePoint 2013 environment. The SharePoint 2010 environment includes a large number of content databases. You restore backups of the content databases to the Microsoft SQL Server instance in the SharePoint 2013 environment. You need to upgrade all content databases and minimize monitoring requirements. What should you do? (To answer, drag the appropriate terms to the correct location or locations in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:
